

Task 2

1) Check if a number is positive using if-else

```
#include <stdio.h>
```

```
int main()
```

```
{  
    int num;
```

```
    printf("Enter a number: ");
```

```
    scanf("%d", &num);
```

```
    if (num > 0) {
```

```
        printf("%d is a positive number.\n", num);
```

```
    }  
    else {
```

```
        printf("%d is not positive number.\n", num);
```

```
    }
```

```
    return 0;
```

```
}
```

output:

Enter a number: 10

10 is positive number

4 2) Switch statement to print day of the week (1-7)

```
#include <stdio.h>
```

```
int main() {
```

```
    int day;
```

```
    printf("Enter day number (1-7):");
```

```
    scanf("%d", &day);
```

```
    switch (day) {
```

```
        case 1:
```

```
            printf("Monday\n");
```

```
            break;
```

```
        case 2:
```

```
            printf("Tuesday\n");
```

```
            break;
```

```
        case 3:
```

```
            printf("Wednesday\n");
```

```
            break;
```

```
        case 4:
```

```
            printf("Thursday\n");
```

```
            break;
```

```
        case 5:
```

```
            printf("Friday\n");
```

```
            break;
```

```
        case 6:
```

```
            printf("Saturday\n");
```

```
            break;
```

case 7:

```
printf("Sunday\n");  
break;  
default: printf("Invalid day\n");  
}  
return 0;  
}
```

output:

Enter day number (1-7): 5

Friday

3) For loop to print numbers from 1 to N

```
#include <stdio.h>
```

```
int main() {
```

```
    int n;
```

```
    printf("Enter the end number: ");
```

```
    scanf("%d", &n);
```

```
    for (int i = 1; i <= n; i++) {
```

```
        printf("%d", i);
```

```
    }
```

```
    printf("\n");
```

```
    return 0;
```

```
}
```

output:

Enter the end number: 10

1 2 3 4 5 6 7 8 9 10

4) while loop to print numbers from 0 to N-1

```
#include <stdio.h>
```

```
int main() {
```

```
    int n, i = 0;
```

```
    printf("Enter the number limit:");
```

```
    scanf("%d", &n);
```

```
    while (i < n) {
```

```
        printf("%d", i);
```

```
        i++;
```

```
    }
```

```
    printf("\n");
```

```
    return 0;
```

```
}
```

Enter the number limit: 5

0 1 2 3 4

5) do-while loop to print number until a user entered limit

```
#include <stdio.h>
```

```
int main() {
```

```
    int i = 0, limit;
```

```
    printf("Enter a limit:");
```

```
    scanf("%d", &limit);
```

```
    do {
```

```
printf("%d", i);  
i++;  
}  
while (i <= limit);  
printf("\n")  
return 0;  
}
```

Output:

Enter a limit : 5

0 1 2 3 4 5
